

Work/Action Plan

1. What courses you have yet to complete in your degree and what skills you are doing to look to develop in these courses?

I have a year and a half left before completing my degree at UFV. I have nine upper-level History courses I still need to complete. I am going to develop research skills, understanding of historical context, public speaking, and ethical and moral reasoning and building on skills I already have such as writing and communication.

2. Class activities will you add to your career development plan and what skills you will be developing.

I will be incorporating the LEAN Career Canvas design into my career development, as it provided a valuable visual representation of my past achievements and future goals. It is a great motivational tool that has helped me stay focused and organized as I plan my career.

3. How you will maintain and continue to build your portfolio?

I plan to continue adding to my portfolio with the more experience and skills I learn along the way. I hope to be able to use this portfolio in real life experiences.
